CYBER SCIENCES ANNOUNCES UPDATE OF STR-100 SATELLITE TIME REFERENCE TO PROVIDE TIME SYNCHRONIZATION VIA IRIG-B

Murfreesboro, TN. – February 13, 2003 – The Model STR-100 Satellite Time Reference from Cyber Sciences, Inc. now offers time synchronization for power monitors and protective relays via IRIG-B time signals. The STR-100/IRIG-B accepts an input from an associated GPS antenna and outputs a highly accurate unmodulated IRIG-B time reference signal for single or multiple devices.

Originally designed to provide time synchronization for Square D PowerLogic® Circuit Monitors, the addition of IRIG-B capability makes it suitable for use with a wide range of power monitors and protective relays. Applications include utility substation automation, sequence-of-events recording (SER), protective relay trip history, alarm/event records, and power monitoring data logs.

Cyber Sciences, Inc. (CSI) is a quality supplier of OEM electronic product design, manufacturing and consulting services and specializes in precision time reference products that use GPS technology. CSI is a privately-held corporation headquartered near Nashville, Tennessee. For more information about the Satellite Time Reference from Cyber Sciences, Inc., please contact us at 1-615-890-6709, or visit our web site at www.cyber-sciences.com.
