CYBER SCIENCES INC. ANNOUNCES P2X2 OBSOLESCENCE

Murfreesboro Tennessee, USA — January 15, 2021. Cyber Sciences, the global leader in precision time solutions for critical power facilities announces the discontinued production of the products listed below effective **January 15, 2021 with end of sales July 30, 2021**. Each obsoleted product will be replaced with a PTP enabled model equivalent as shown below.

Obsoleted Part Number	Replacement Part Number
SER-3200-P2X2	SER-3200-PTP
SER-2408-P2X2	SER-2408-PTP

The Sequence of Events Recorder “PTP” models have the same form, fit and function as the “P2X2” devices with the addition of Precision Time Protocol (PTP) per IEEE 1588. This allows SER devices to synchronize their clocks over an Ethernet network without need of additional cabling as required by protocols such as IRIG-B, DCF77 or ASCII RS485.

Warranty and Aftermarket Support for Obsoleted Products:

Standard warranty terms apply to last time product purchases. As necessary, obsoleted products will be replaced by their equivalent during the warranty period at no additional cost. Obsoleted products, outside the warranty period, may require additional cost to upgrade.

Thank you for your continued business and trust as a valued partner. Should you have any questions about this notification, contact us at:
